## BENEFIT

Complete data security.

Allows the recovery of any backed up version of a document over the preceding 30 days.

Allows you to choose what document type you want to back up.

Back ups occur automatically and are free of human error.

sureVault allows you to recover your files at any time of the day or night.

Installation and configuration of the sureVault client takes only 10 minutes.

Back up your computer from anywhere in the World by dialing into our independent information vault just as if you were at the office. A truly portable solution.

Worldclass backup service with no cost of hardware.

This world-leading technology minimizes the back up time by only sending the changes to your information.

## CAPTURE, MANAGE, PROTECT

Redmap's Capture, Manage and Protect solutions have been designed to work in a stand-alone environment or integrated with each other for optimal business benefits.

**Capture** - Redmap's Capture solutions allow businesses to systematically capture the information that is vital to their business.

**Manage** - Redmap's Manage solutions allow electronically stored information to be effectively managed from one central location, regardless of the file format.

**Protect** - Redmap's Protect solutions automate the data back up process to minimise the drain on IT or business resources.
