Formfile's quality filing cabinets and shelving units come in a wide range of space saving, ergonomic designs with styles and colours to meet every functional and aesthetic requirement of the modern office.

 **Formfile Filing Systems**

Filing Cabinets and 'Compactus Style' Mobile Shelving Units

Receding door cabinets, Ezi-Store 'Open Bay' shelving systems, and the very best in 'compactus style' storage units are just some of the many options available.

Formfile's Tambour Door Cabinets

The space-efficient design of Formfile's Tambour Door Cabinets ensures unrestricted access to the cabinet while the office thoroughfares are uninterrupted by doors that open outward. The reinforced PVC slatted doors fully retract into the stylish cabinet. Available in a range of colours and sizes, cabinets are lockable and feature adjustable shelving, combine them with our specialised accessories for convenient storage solutions for a range of different media.

Formfile's Base Mounted and Aisle Saver Mobile Storage System

Easily convert your Static shelving units to Compactus style units. Base mounted mobile storage units maximise the effective use of floor space. Extremely strong, pre-fabricated bases do not require fixing to the floor.

Aislesaver Mobile Storage Units do not require a base. The units utilise a unique low profile track which can be installed on most floor surfaces. They can be installed in a conventional cross-aisle direction or a lateral, sideways-moving mode. Tracks do not require fixing to the floor making them quick to install, easy to move and easy to relocate or reconfigure.

'Compactus style' Fixed Mobile Storage Systems

Fixed Mobile Storage Units are imbedded into the floor. There are three types; manual, mechanical and powered. Manually operated Units are specifically designed for medium size installations. Ergonomically designed handles require only the slightest touch to initiate smooth movement of the mobiles.

Mechanical (Hand or power operated) Mobile Storage Units have heavy-duty storage bays designed for multiple bay installations. Safety-designed hand wheels require minimum operator effort. Units moves quietly and easily.
